ABSTRACTED-PUB-NO: EP 411101B

BASIC-ABSTRACT:

A method of preserving a prod. by preventing oxidation, quenching singlet oxygen or inhibiting mould growth in the prod. comprises adding to the prod. a safe and effective amt. of an active form of conjugated linoleic acids (CLA). Also claimed is a method of preserving a prod. by adding linoleic acid and a protein capable of in situ converting the linoleic acid to CLA, a safe and effective preservative comprising CLA and a non-toxic salt of 9,11-octadecadienoic acid, 10,12-octadecadienoic acid or their active isomers.

USE/ADVANTAGE - The method of preserving the food is safe, natural and effective. The novel compsns. can be prep'd. by a simple, inexpensive method. The amt. employed of CLA and its non-toxic salts is 1-1,000 ppm of prod.. The compsn. can be used in natural foods. @ (29pp DWg.No.0/4)

EQUIVALENT-ABSTRACTS:

A method of inhibiting mould growth in a product which comprises adding to said product 9,11-octadecadienoic acid, 10,12-octadecadienoic acid or a non-toxic salt thereof.

Oxidn. is prevented, singlet oxygen quenched, and mould growth is a fatty acid-contg. prod. is inhibited by adding the free conjugated linoleic acids (CLA) 9,11-octadecadienoic acid and 10,12-octadecadienoic acid. CLA is pref. added by forming it in situ by adding linoleic acid and protein contg. SH-gps. to the prod. Pref. protein is whey protein. ADVANTAGE - Can be used on true natural foods, is safe and inexpensive.
